

BASICS OF

SUBTRACTION

WHAT IS SUBTRACTION?

Subtraction is about taking away from a group to see what's left. Let's say you have 5 apples, and you eat 2. How many apples are left after eating?

$$5 - 2 = ?$$

HOW TO SUBTRACT

START

Start with the first number. Let's say you have the number 4.

TAKE AWAY

If you're subtracting another number, like 2, take away that many from the first number. So, you take away 2 from 4.

FIND

After taking away, you find that you have 2 left. So, 4 minus 2 equals 2.

SUBTRACTION SYMBOL (-)

In subtraction, we use the minus sign (-)
to show we're taking away numbers.
It's like a disappearing wand!

Parts of a Subtraction Equation

**I can use a number
line to subtract and
find missing
numbers.**

VOCABULARY

Number line - a line that shows numbers as a series of points or tick marks.

Point - a dot, an exact location.

Pattern - repeated sequence; arranged following a rule or rules.

Skip Count - counting forwards or backwards a number other than 1.

This is a number line.

Numbers get *greater* when you count this way.

Numbers get *smaller* when you count this way.

$$7 - 5 = 2$$

SUBTRACTION

$$10 - 4 =$$

SUBTRACTION

MISSING NUMBER

$$6 + 1 = \textcircled{7}$$

$$8 - 1 = \textcircled{7}$$

MISSING NUMBER

Question

$$15 - 6$$

What is...

A. Nine

B. Ten

C. Twelve

Answer

15 - 6

What is...

A. Nine

B. Ten

C. Twelve

Solve the subtraction problem:

$$12 - 4 = ?$$

Solve the subtraction problem:

$$10 - 5 = ?$$

Solve the subtraction problem:

$$16 - 4 = ?$$

Solve the subtraction problem:

$$11 - 7 = ?$$

Solve the subtraction problem:

$$10 - 9 = ?$$

Solve the subtraction problem:

$$13 - 3 = ?$$

Solve the subtraction problem:

$$18 - 7 = ?$$

Solve the subtraction problem:

$$11 - 3 = ?$$

GOOD JOB
