

ADDITION

1 - 10

VOCABULARY

Addition is joining numbers together to make a larger number. There are many words used in addition:

altogether

together

plus

add

combine

total

NUMBER SENTENCE

An addition number sentence is made up of numbers, a plus sign and an equals sign:

$$1 + 3 = 4$$

EQUALS

The “equals” sign means, “the same as”.

$$1 + 3 = 2 + 2$$

Read this number sentence out loud:

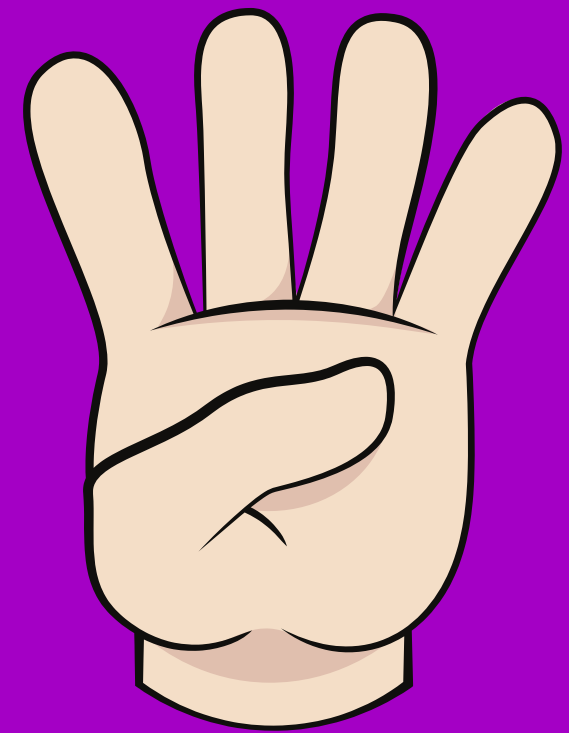

$$4 + 3 = 7$$

Read this number sentence out loud:

$$5 + 3 = 8$$

COUNTING

We can use our fingers to help us count. Let's practice together:

Count the number of fingers
in total:

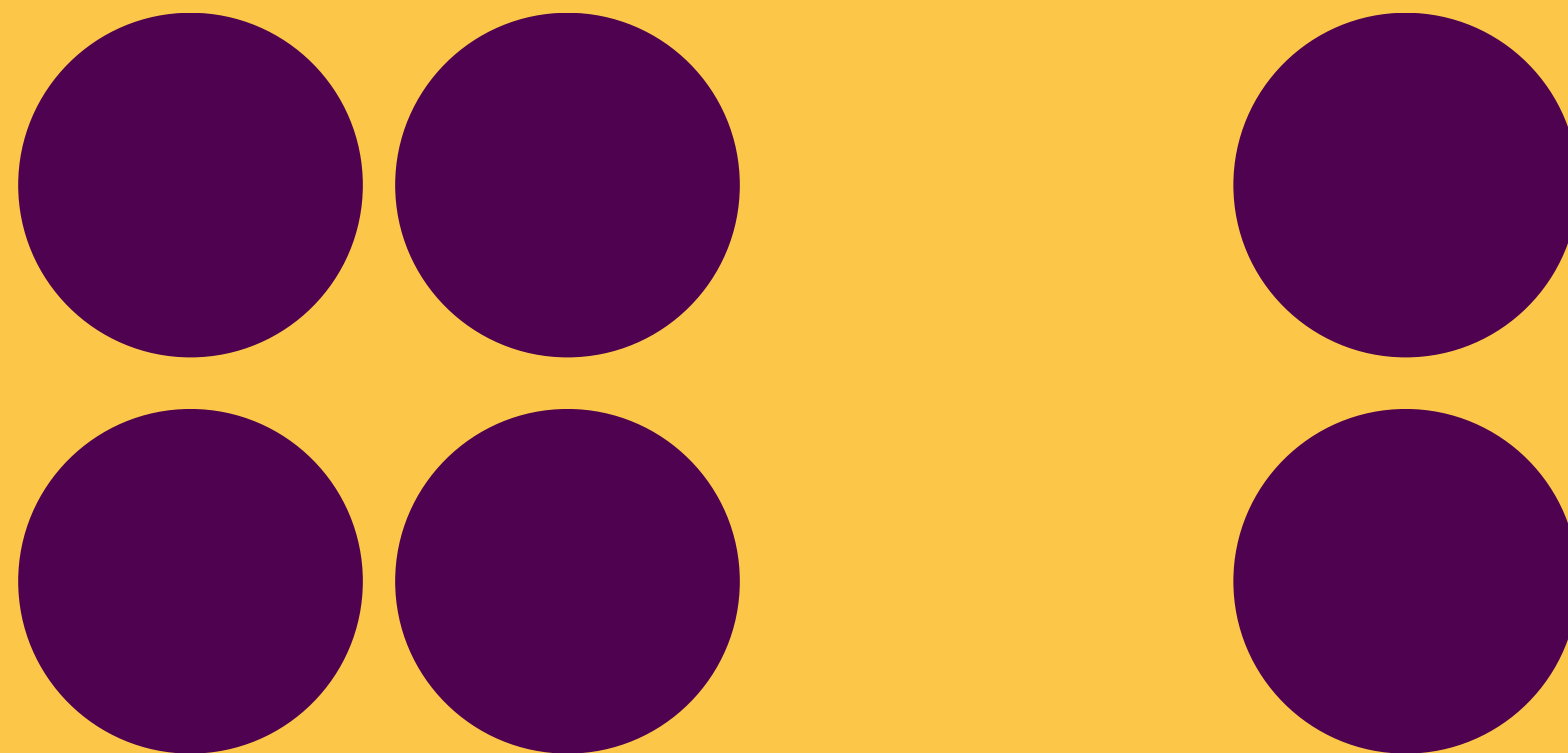

Count the number of fingers
in total:

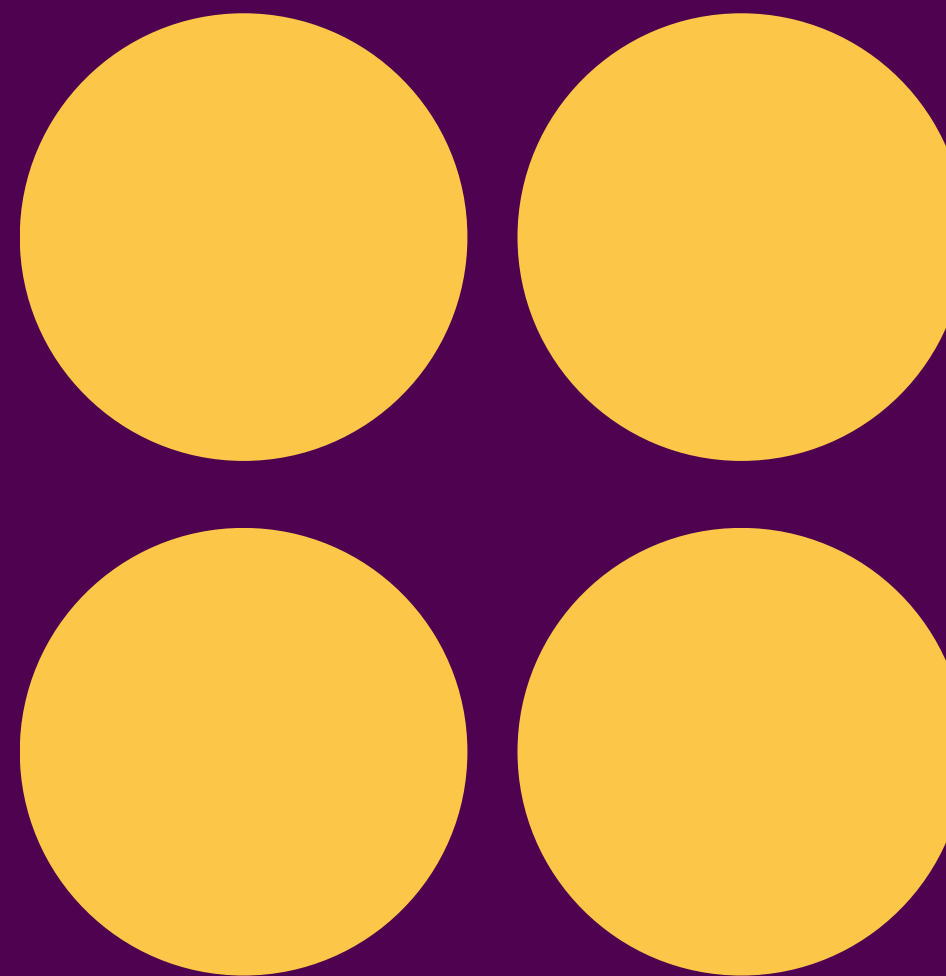

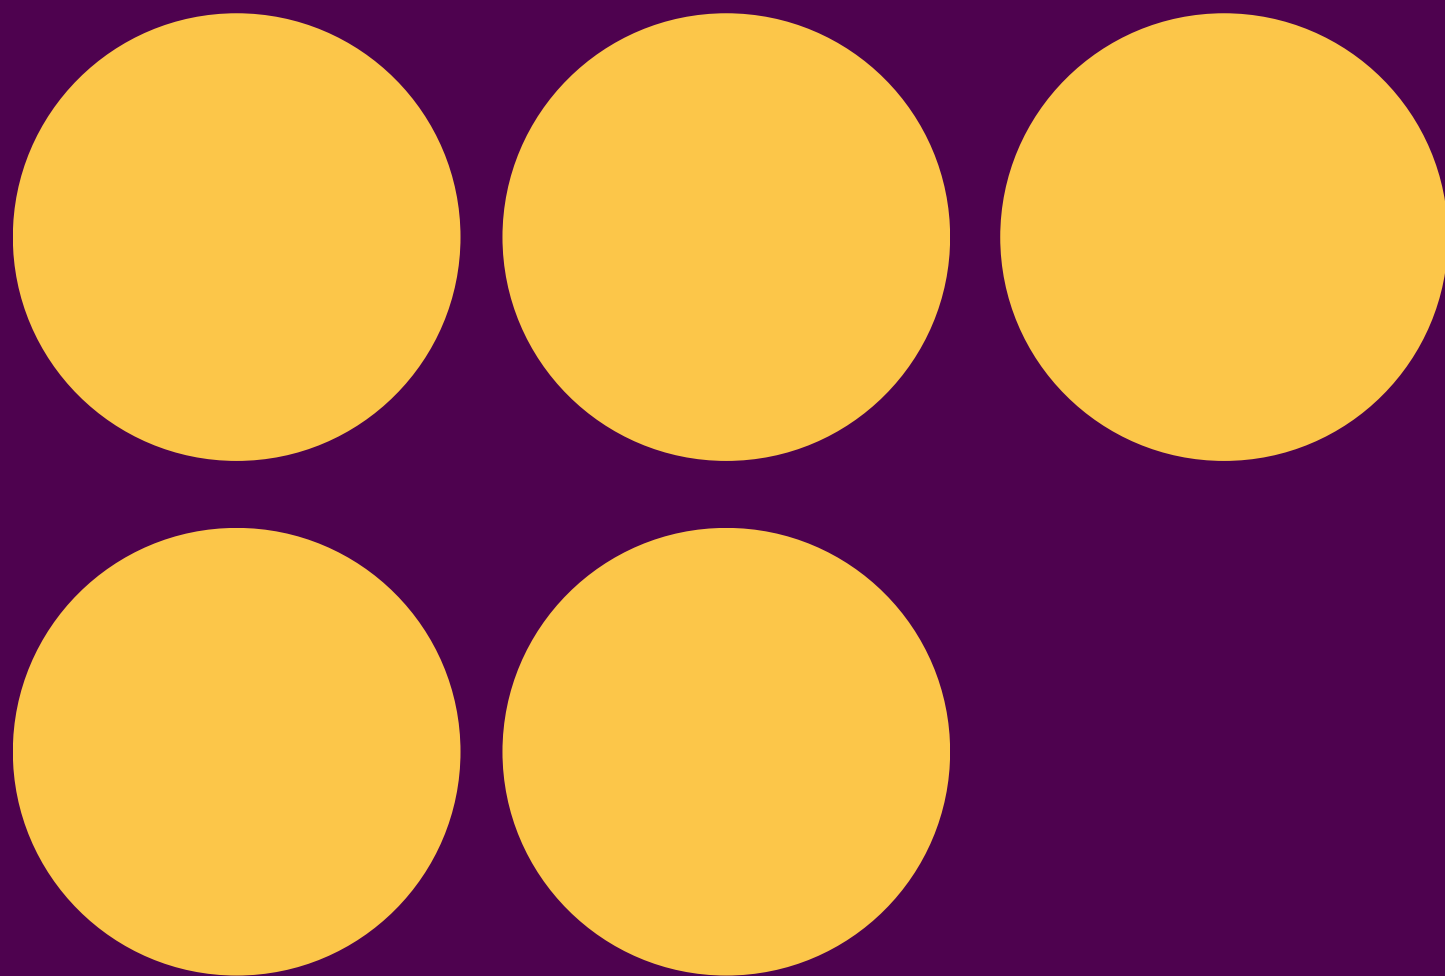

COUNTERS

We can use counters and blocks to help us add.

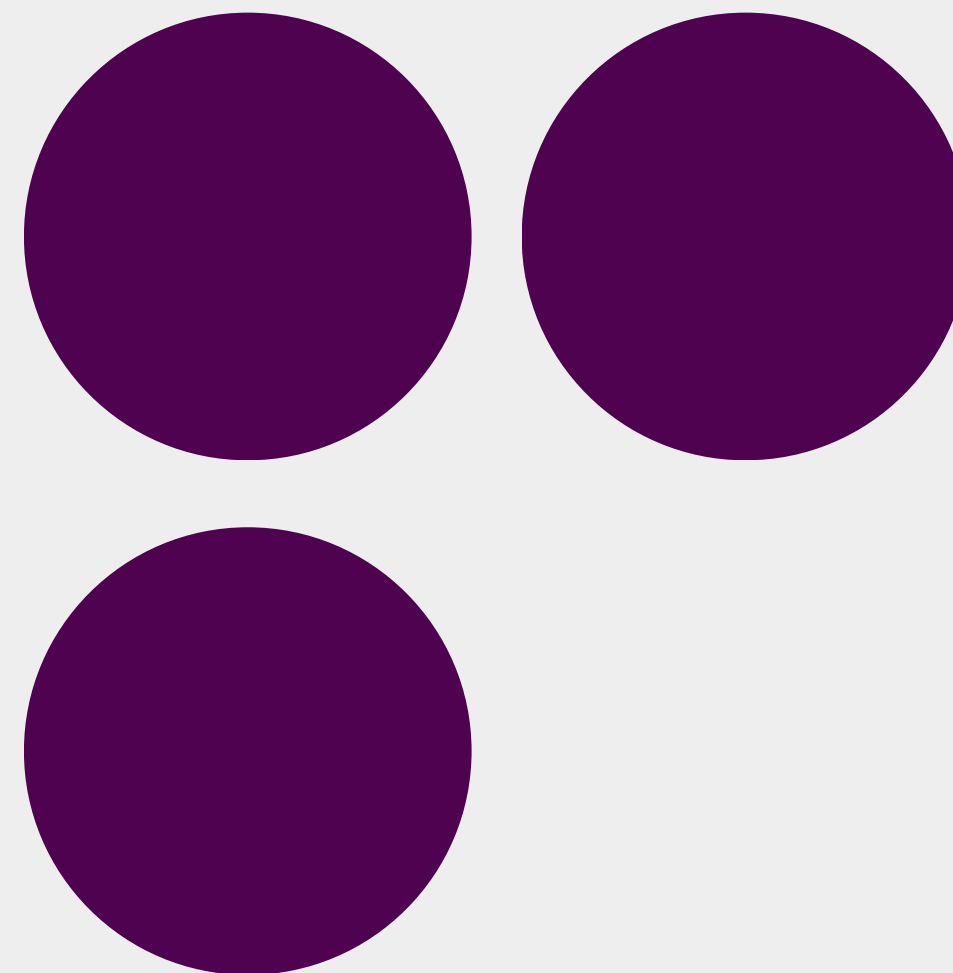

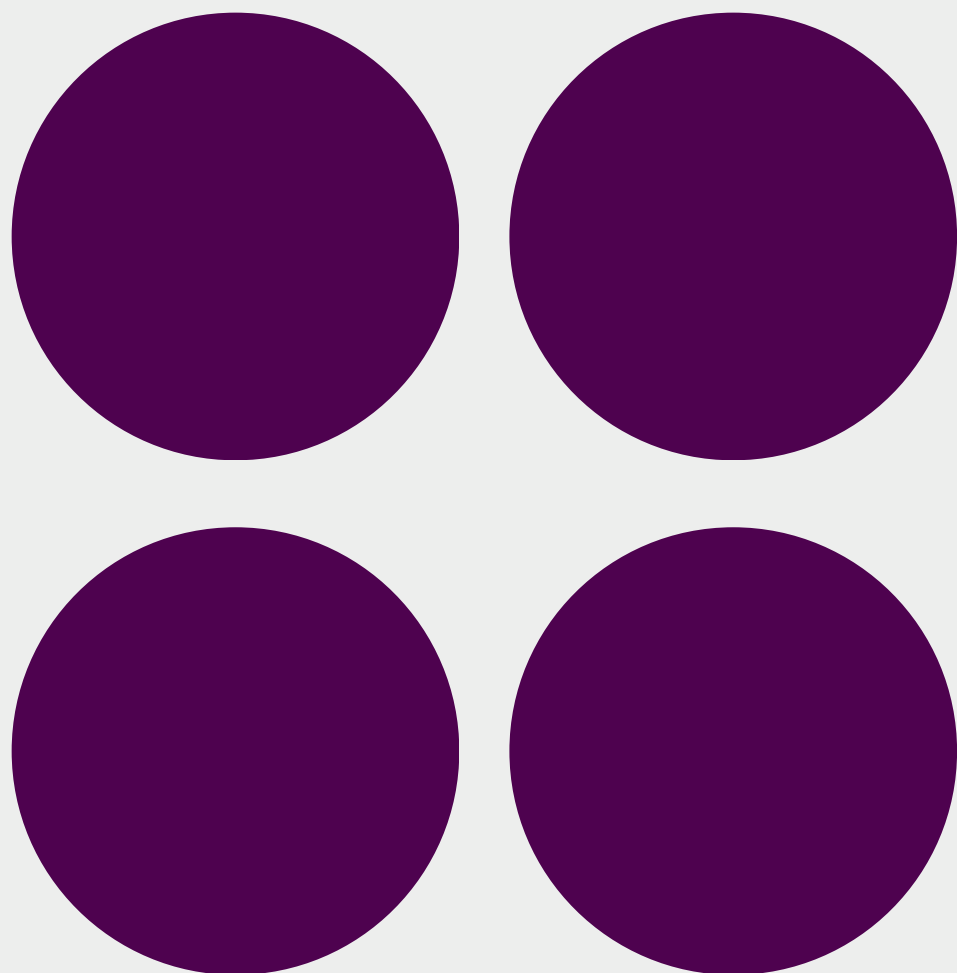

Let's practice together:

Count the total:

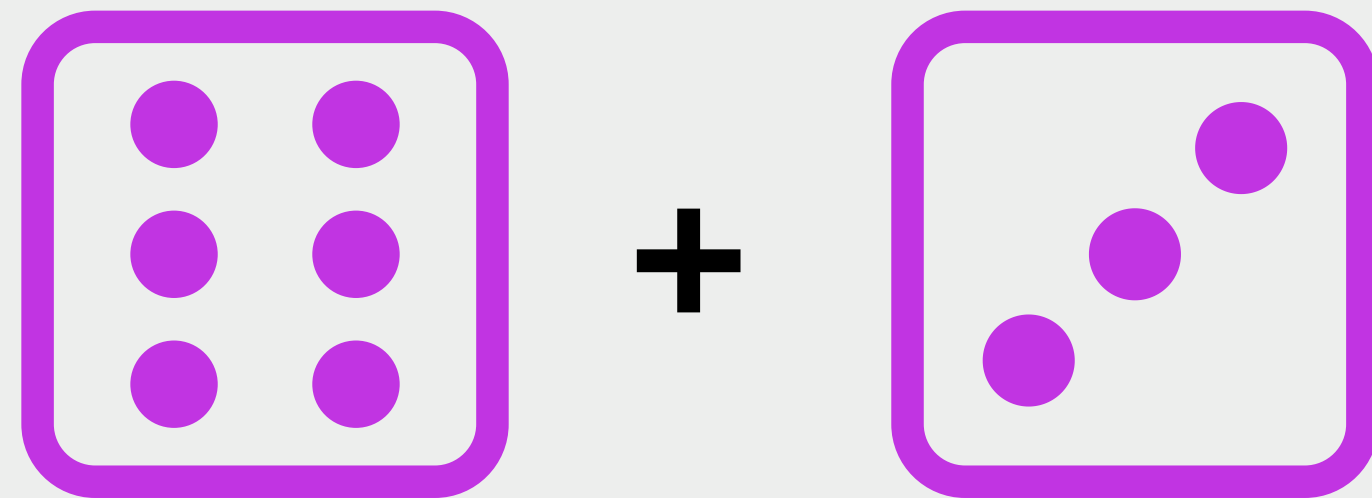

Count the total:

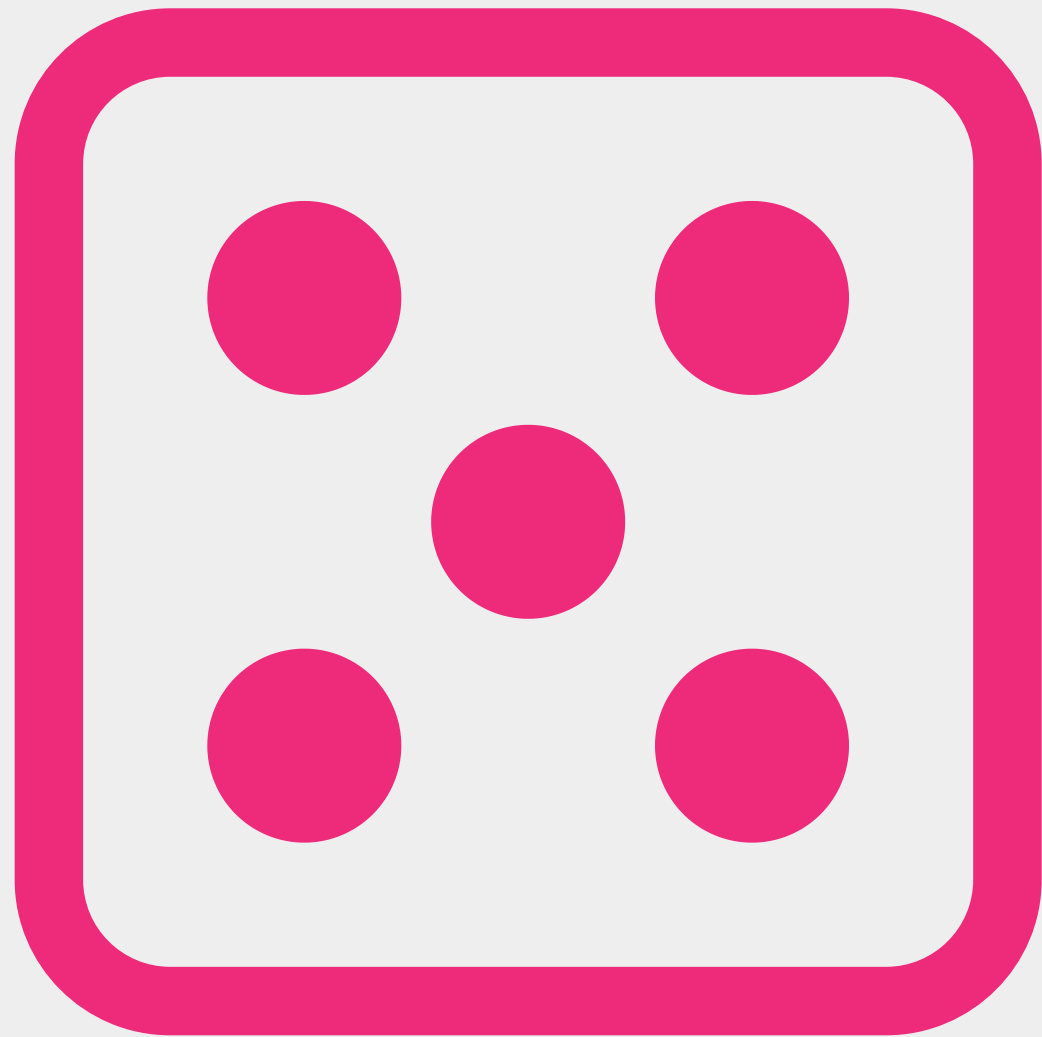

DICE

We can also use dice to help us add.

Let's practice together:

Add the total:

+

Add the total:

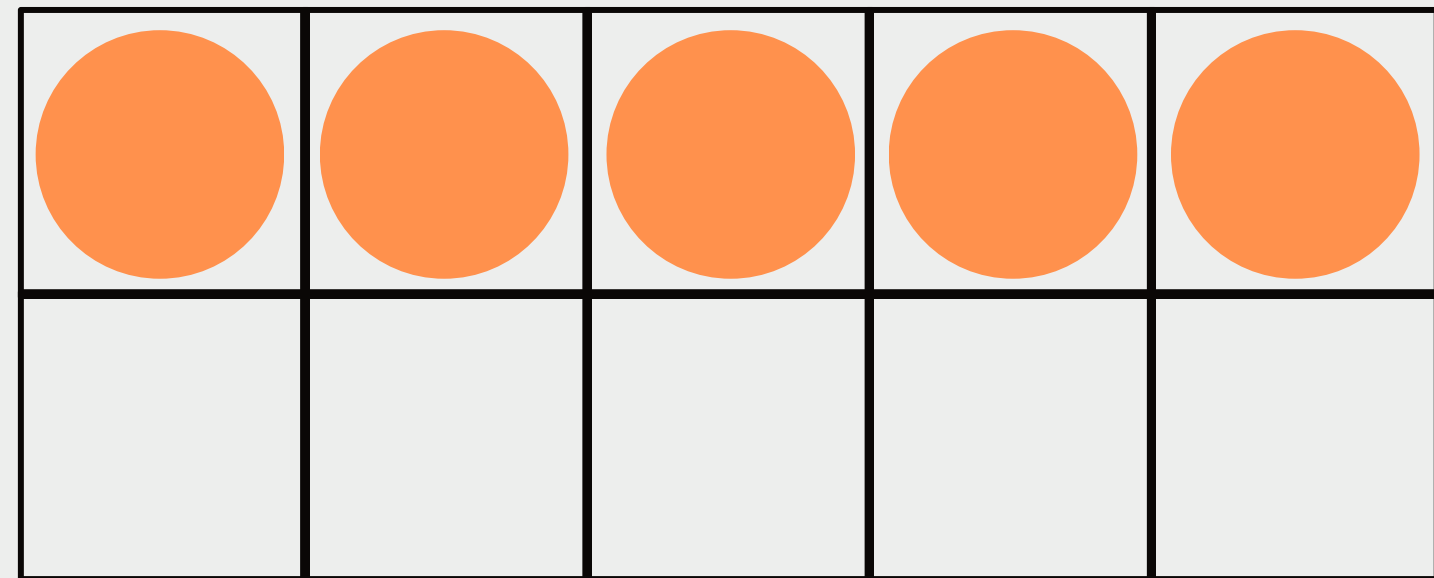

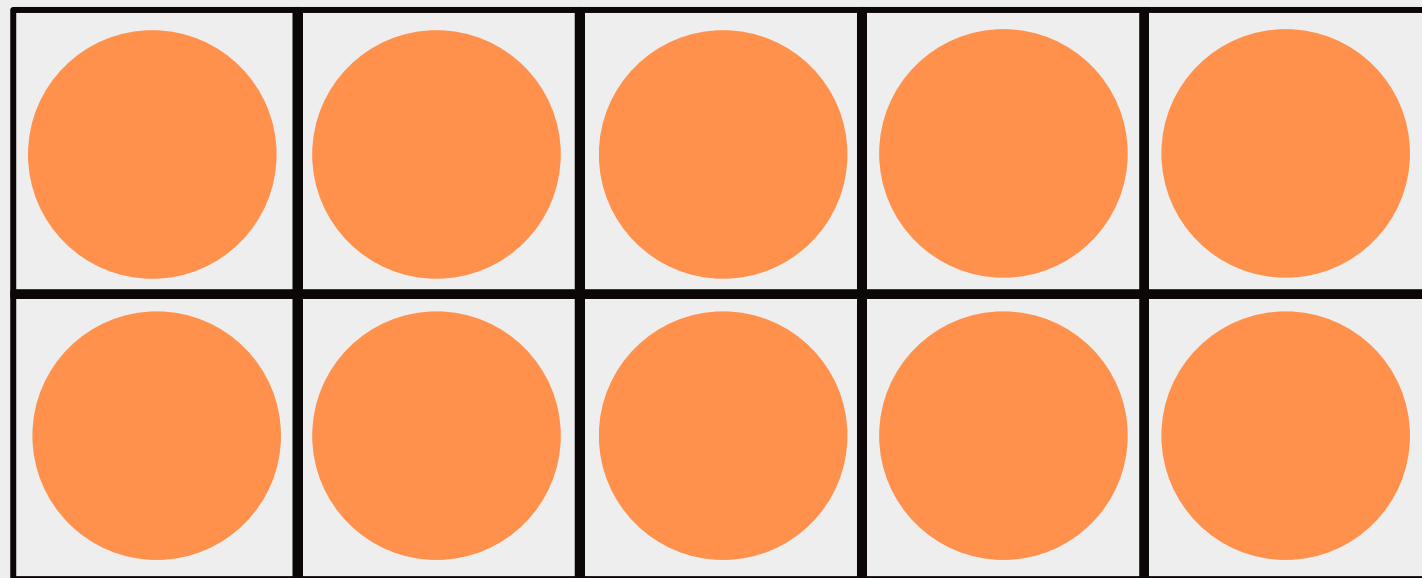

+

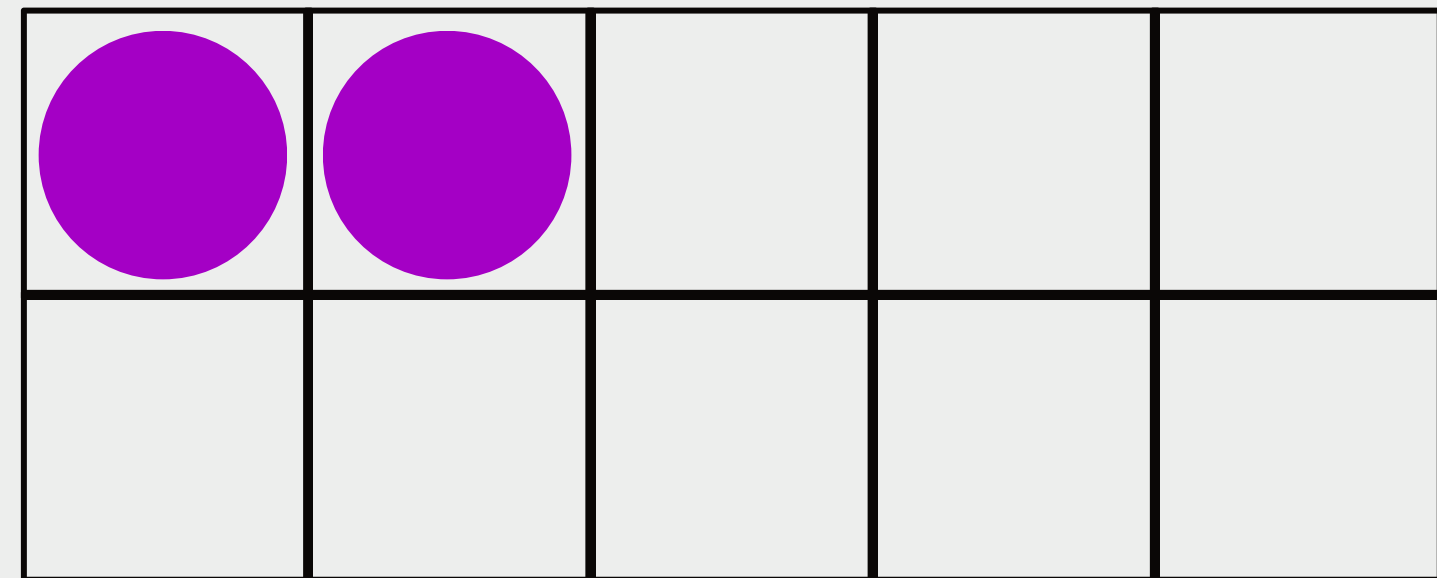

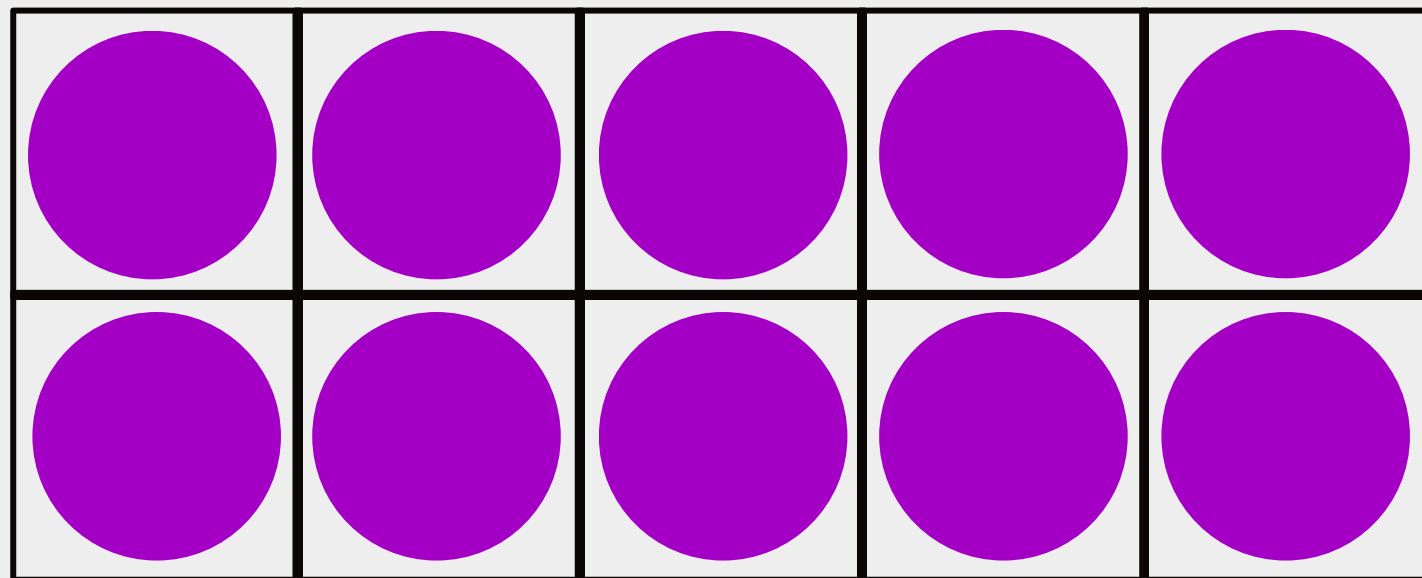

TENS FRAME

Tens frames can help us with our addition.

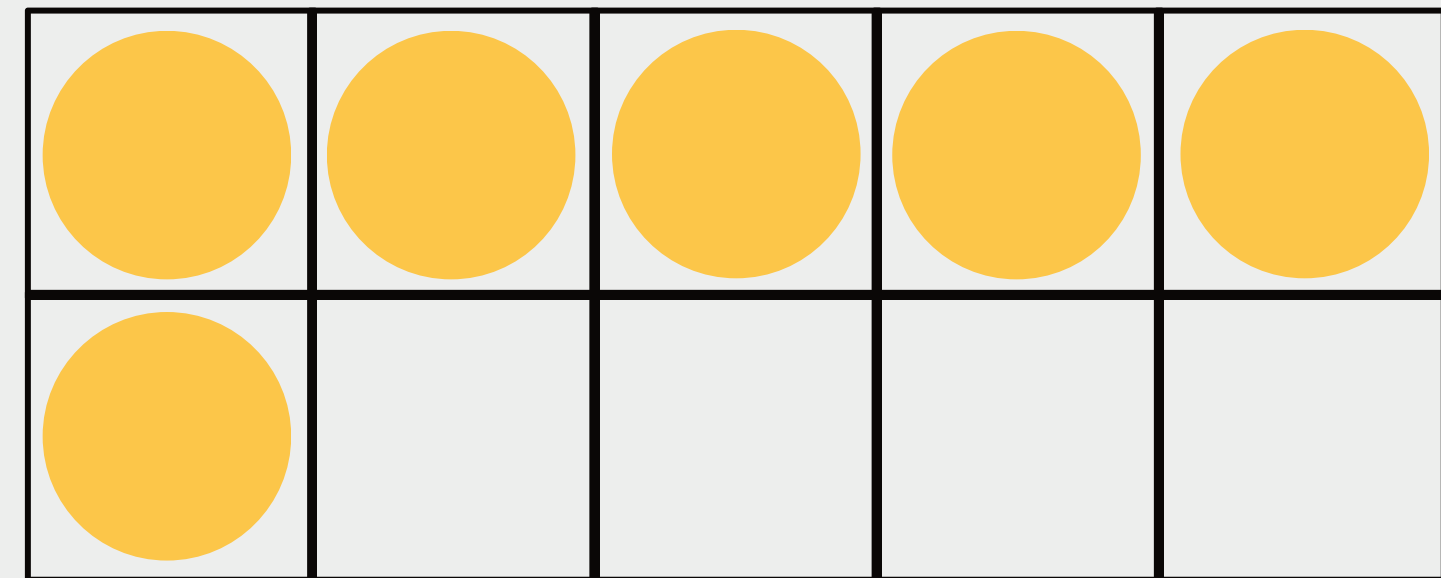

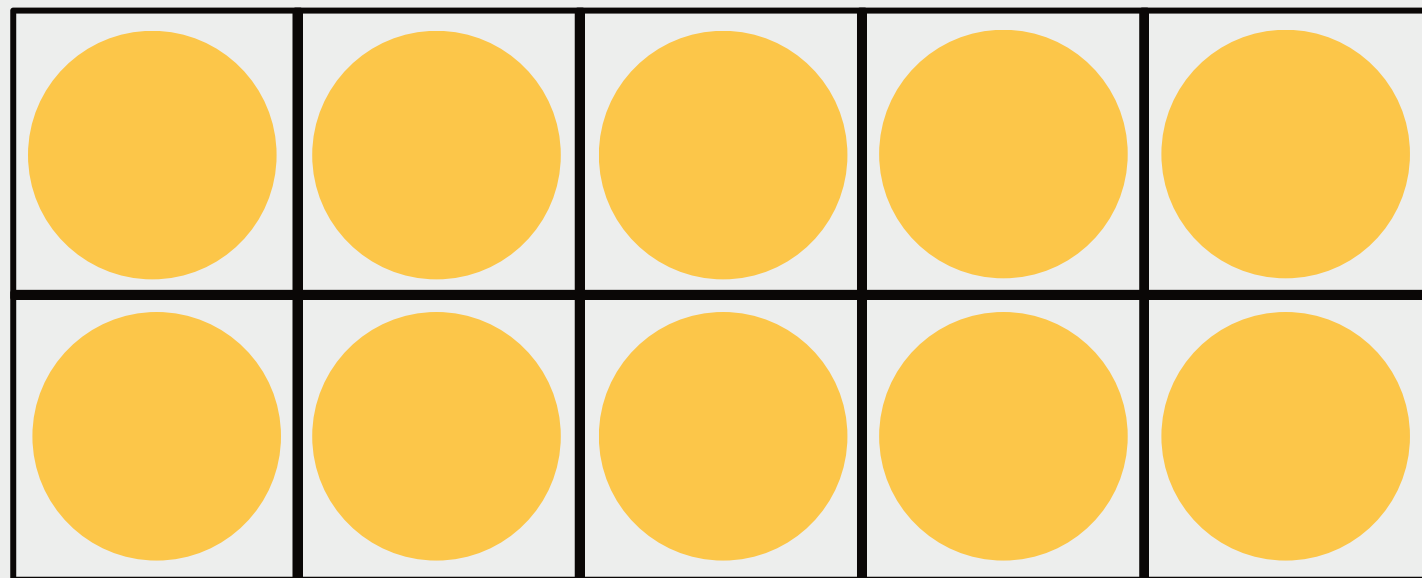

Let's practice together:

Add the total:

Add the total:

COUNTING ON

We can add by putting the bigger number in our head and counting on.

Circle the hand with the most fingers.

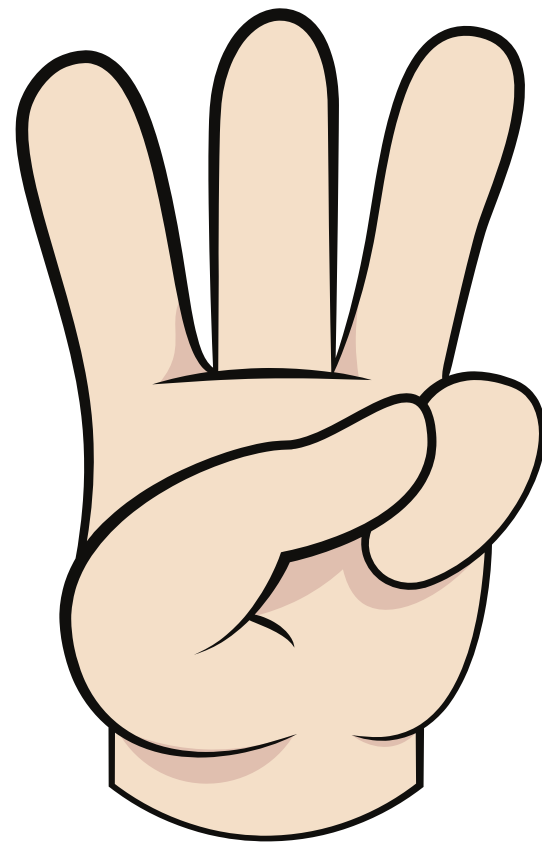

Put that number in your head. Count the remaining numbers to find the total.

Find the total:

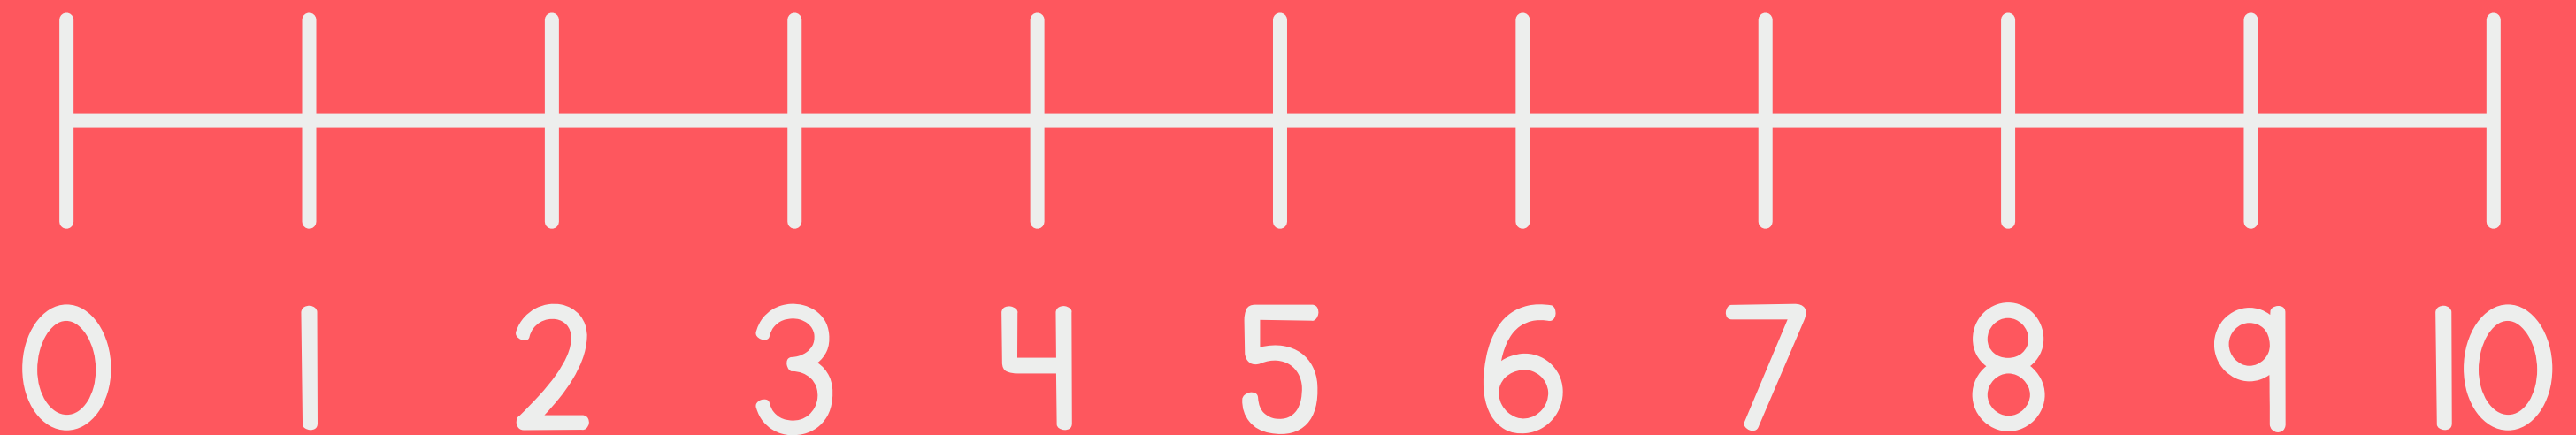

Find the total:

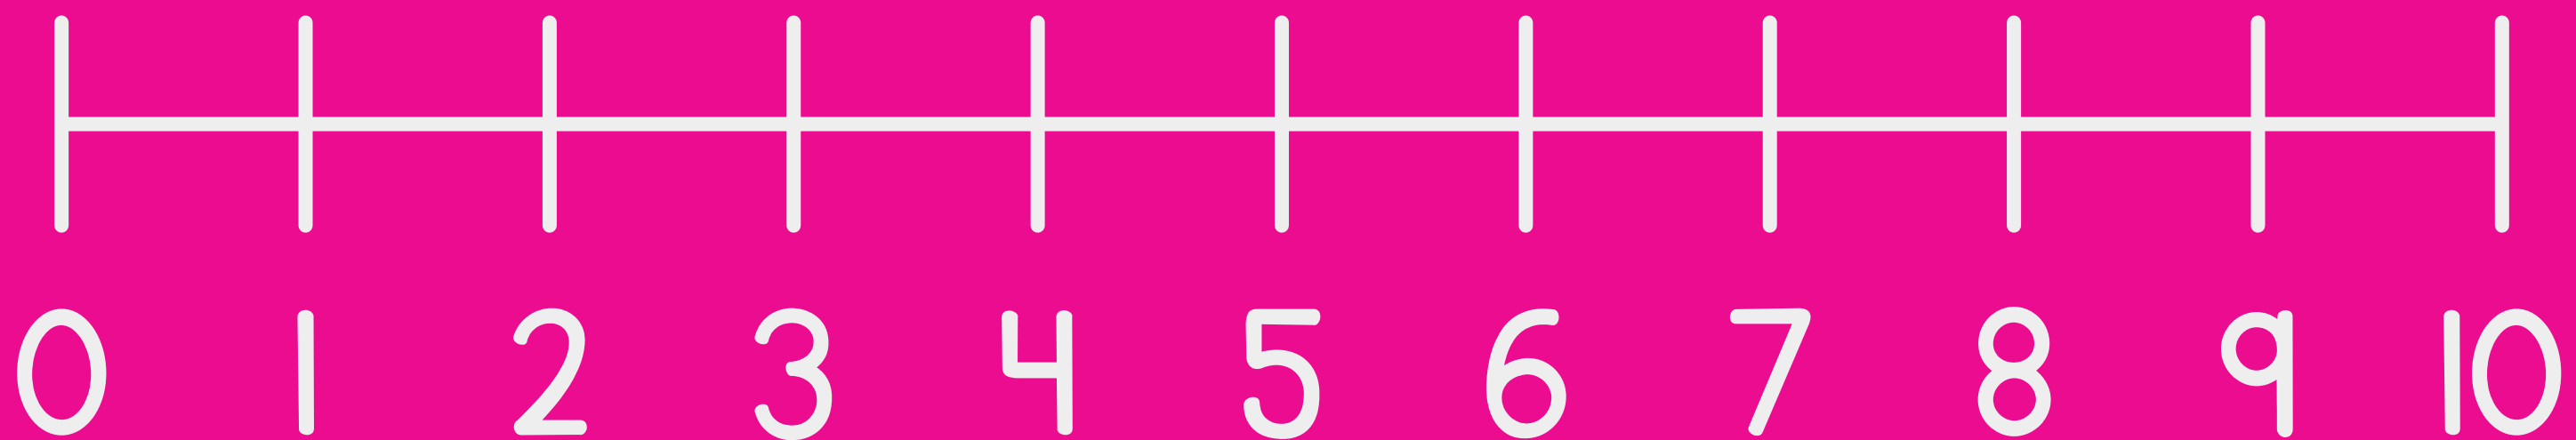

NUMBER LINE

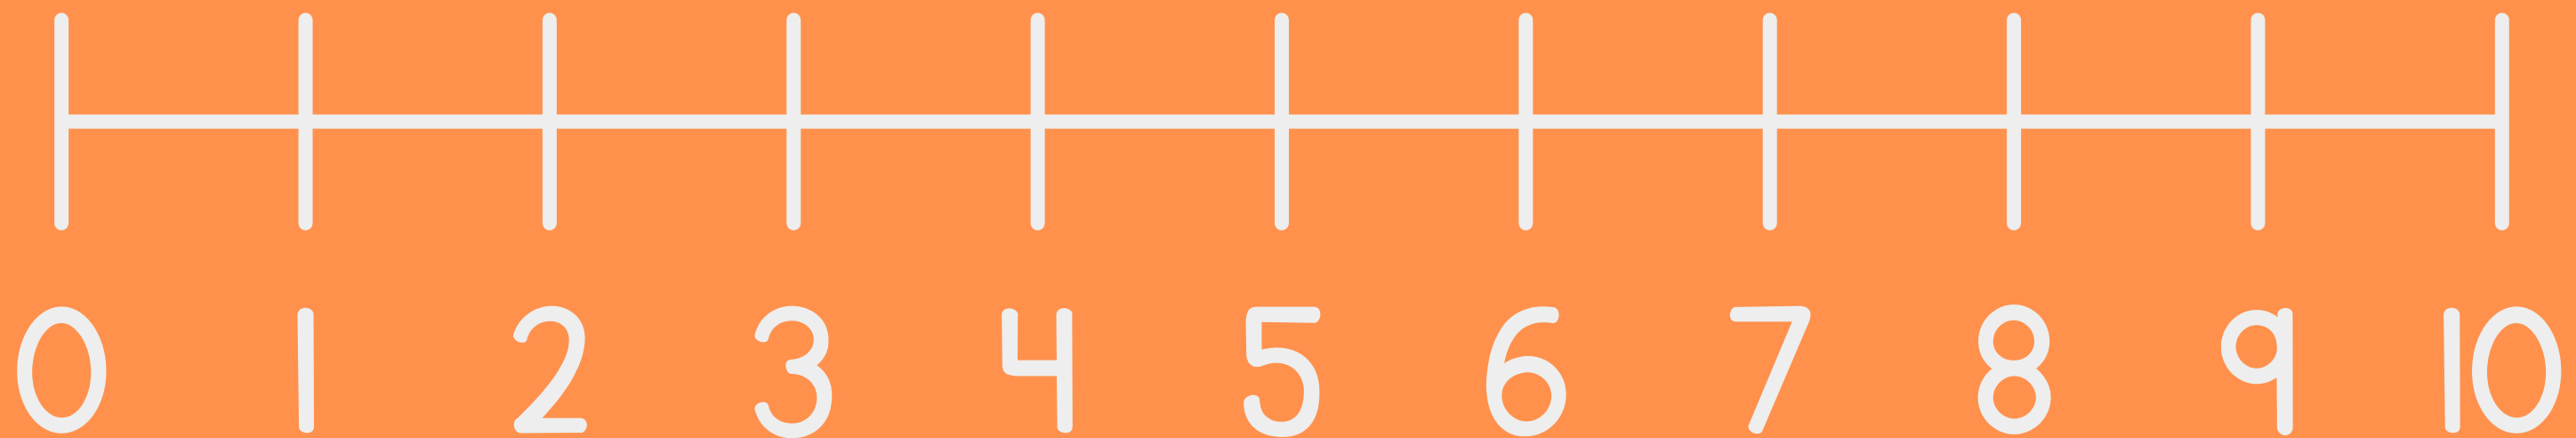

A number line is a line with numbers that we can use to help us add numbers together.

$$4 + 2 =$$

$$3 + 5 =$$

DOUBLES

When we double something, we use the same number and add it to itself.

$$2 + 2 = 4$$

$$4 + 4 = 8$$

Find the total:

Find the total:

NEAR DOUBLES

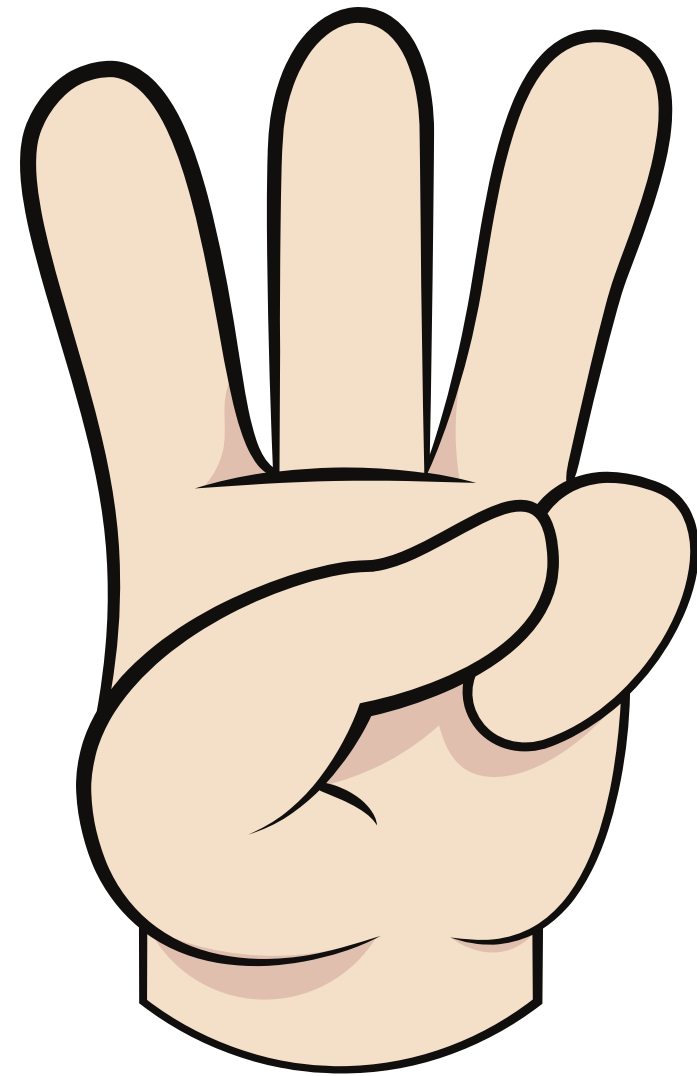

A near double is an almost double. When adding near doubles, add the two doubles and then one more.

Find the total:

Find the total:

COMMUTATIVE PROPERTY

“Commutative” means to “move around”. In addition, you can change the numbers around and the answer will stay the same.

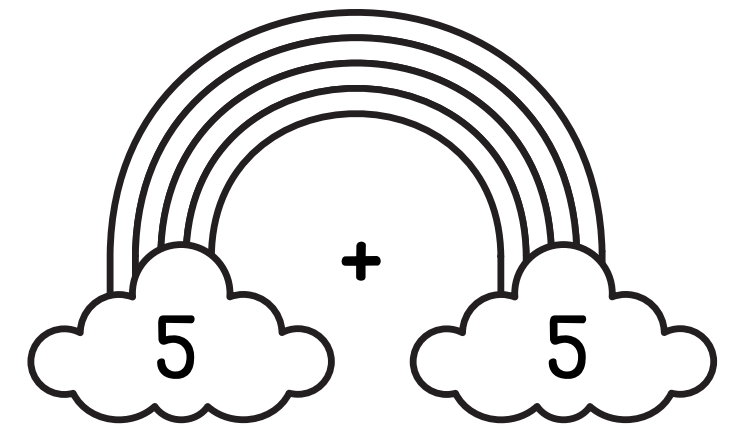

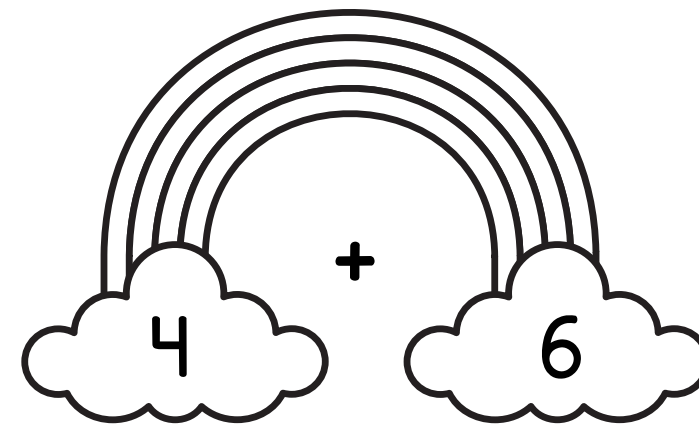

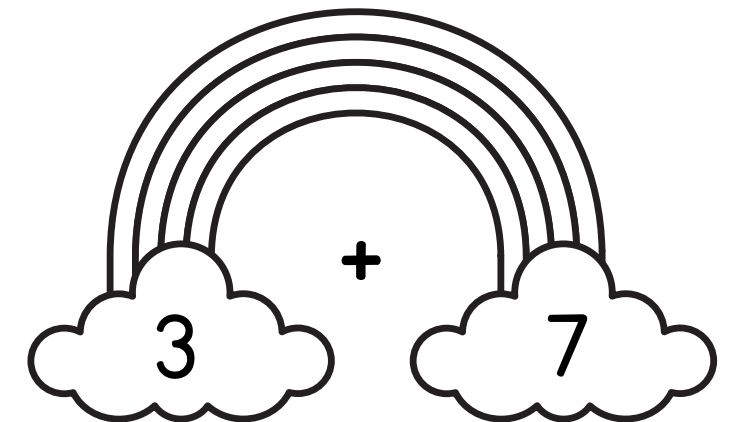

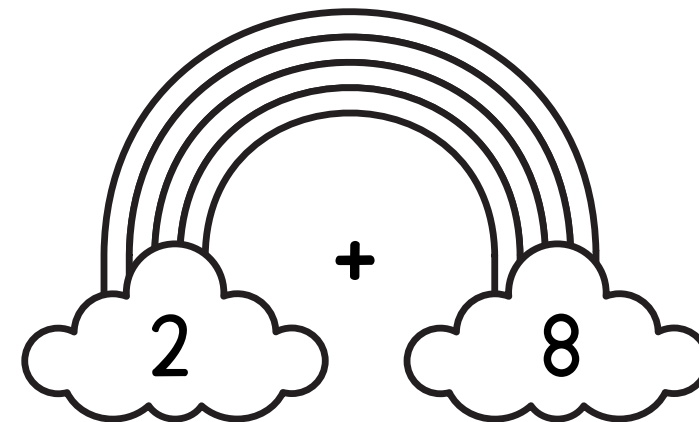

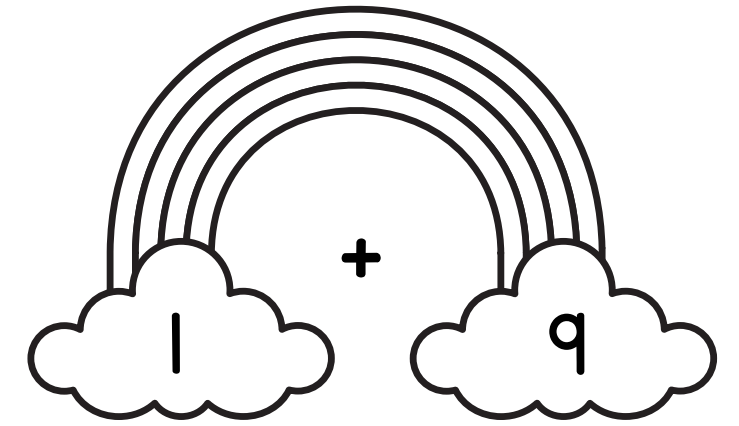

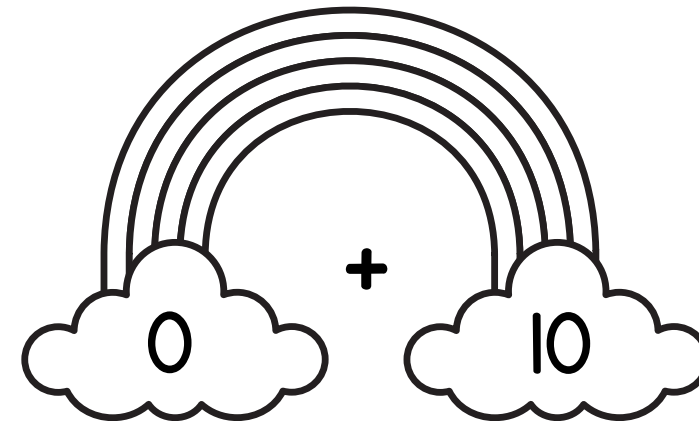

$$4 + 5 = 9$$

$$5 + 4 = 9$$

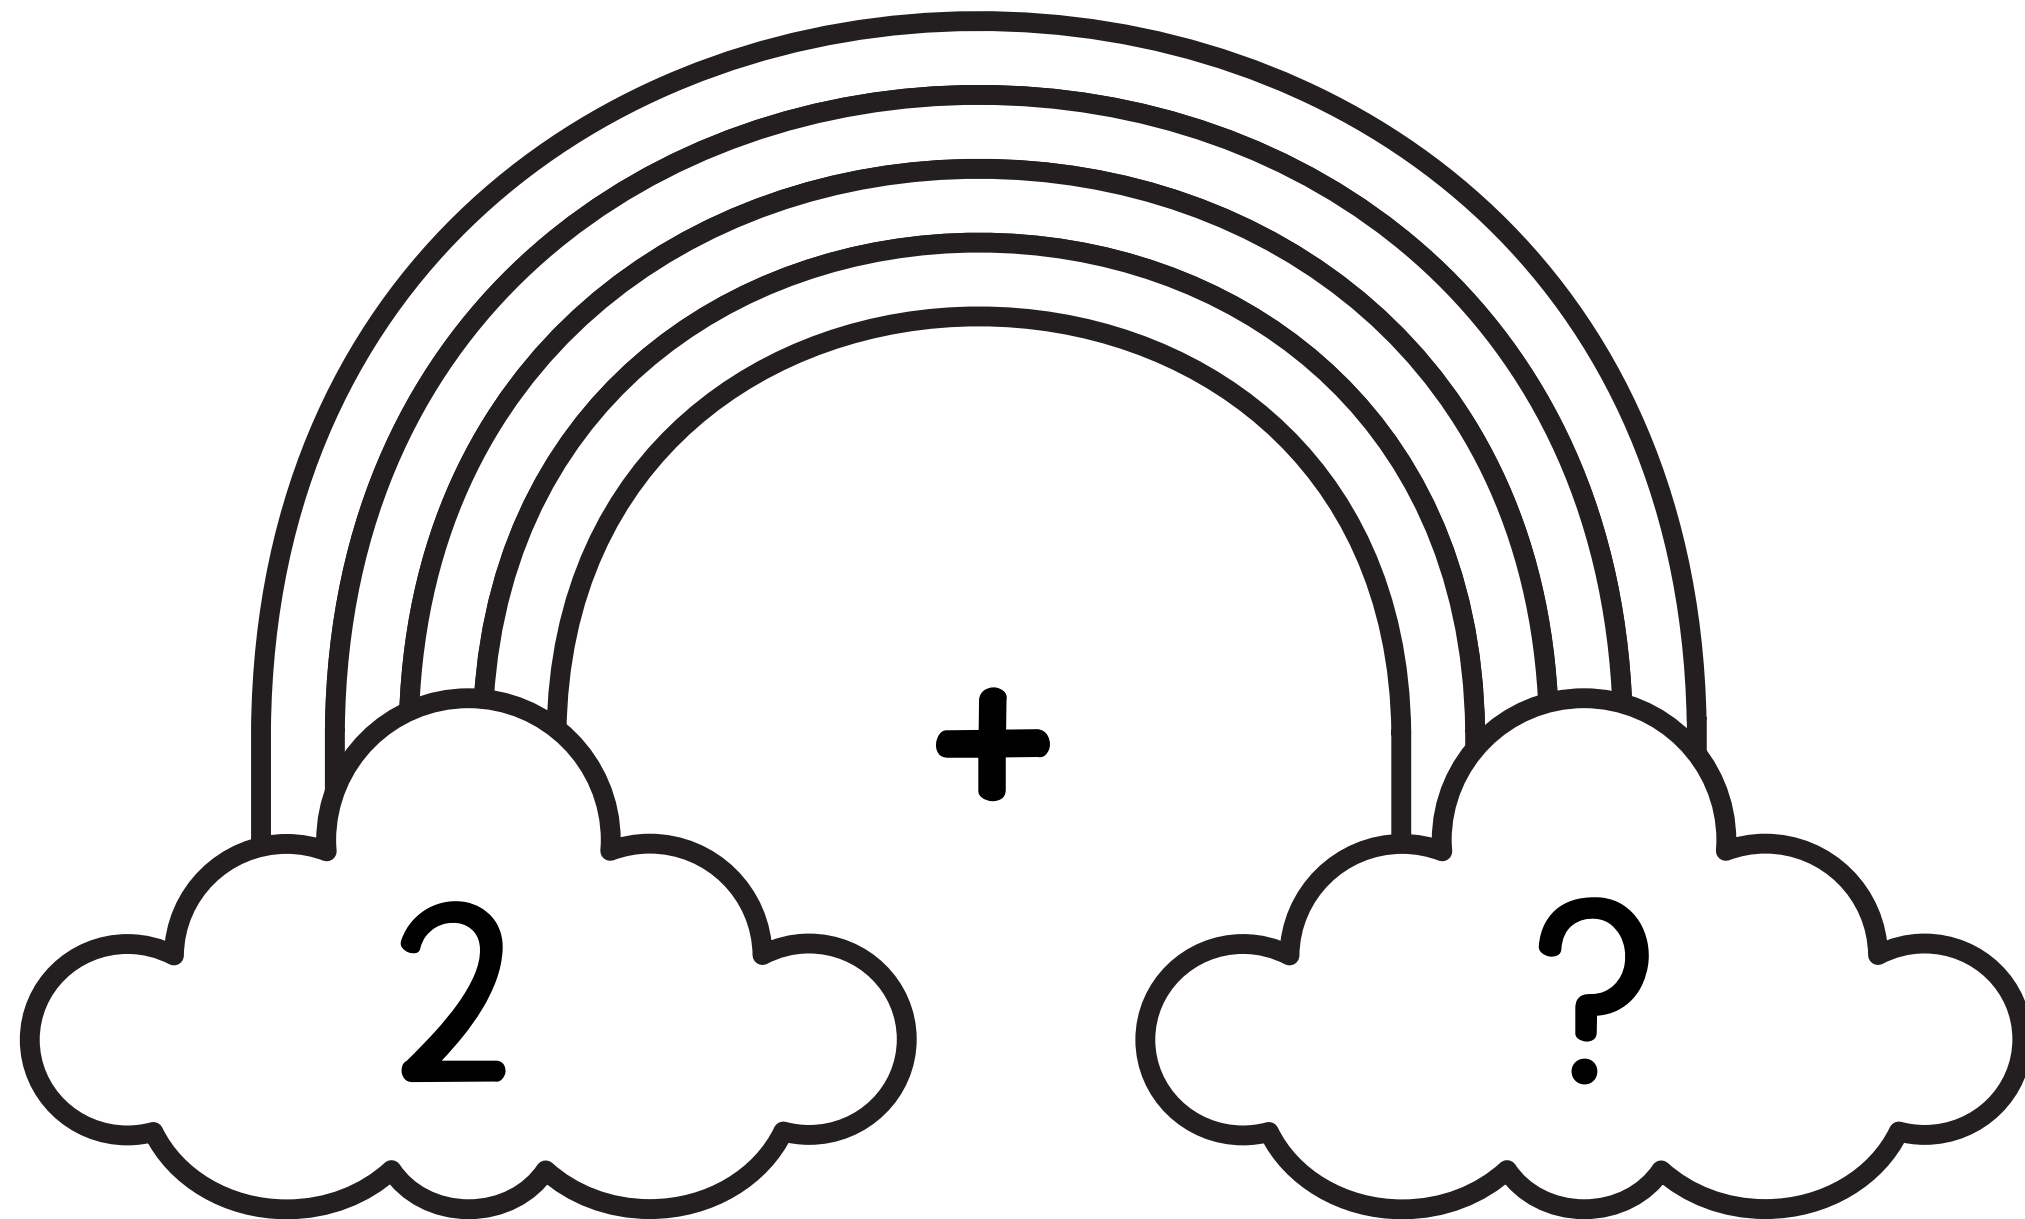

FRIENDS

OF 10

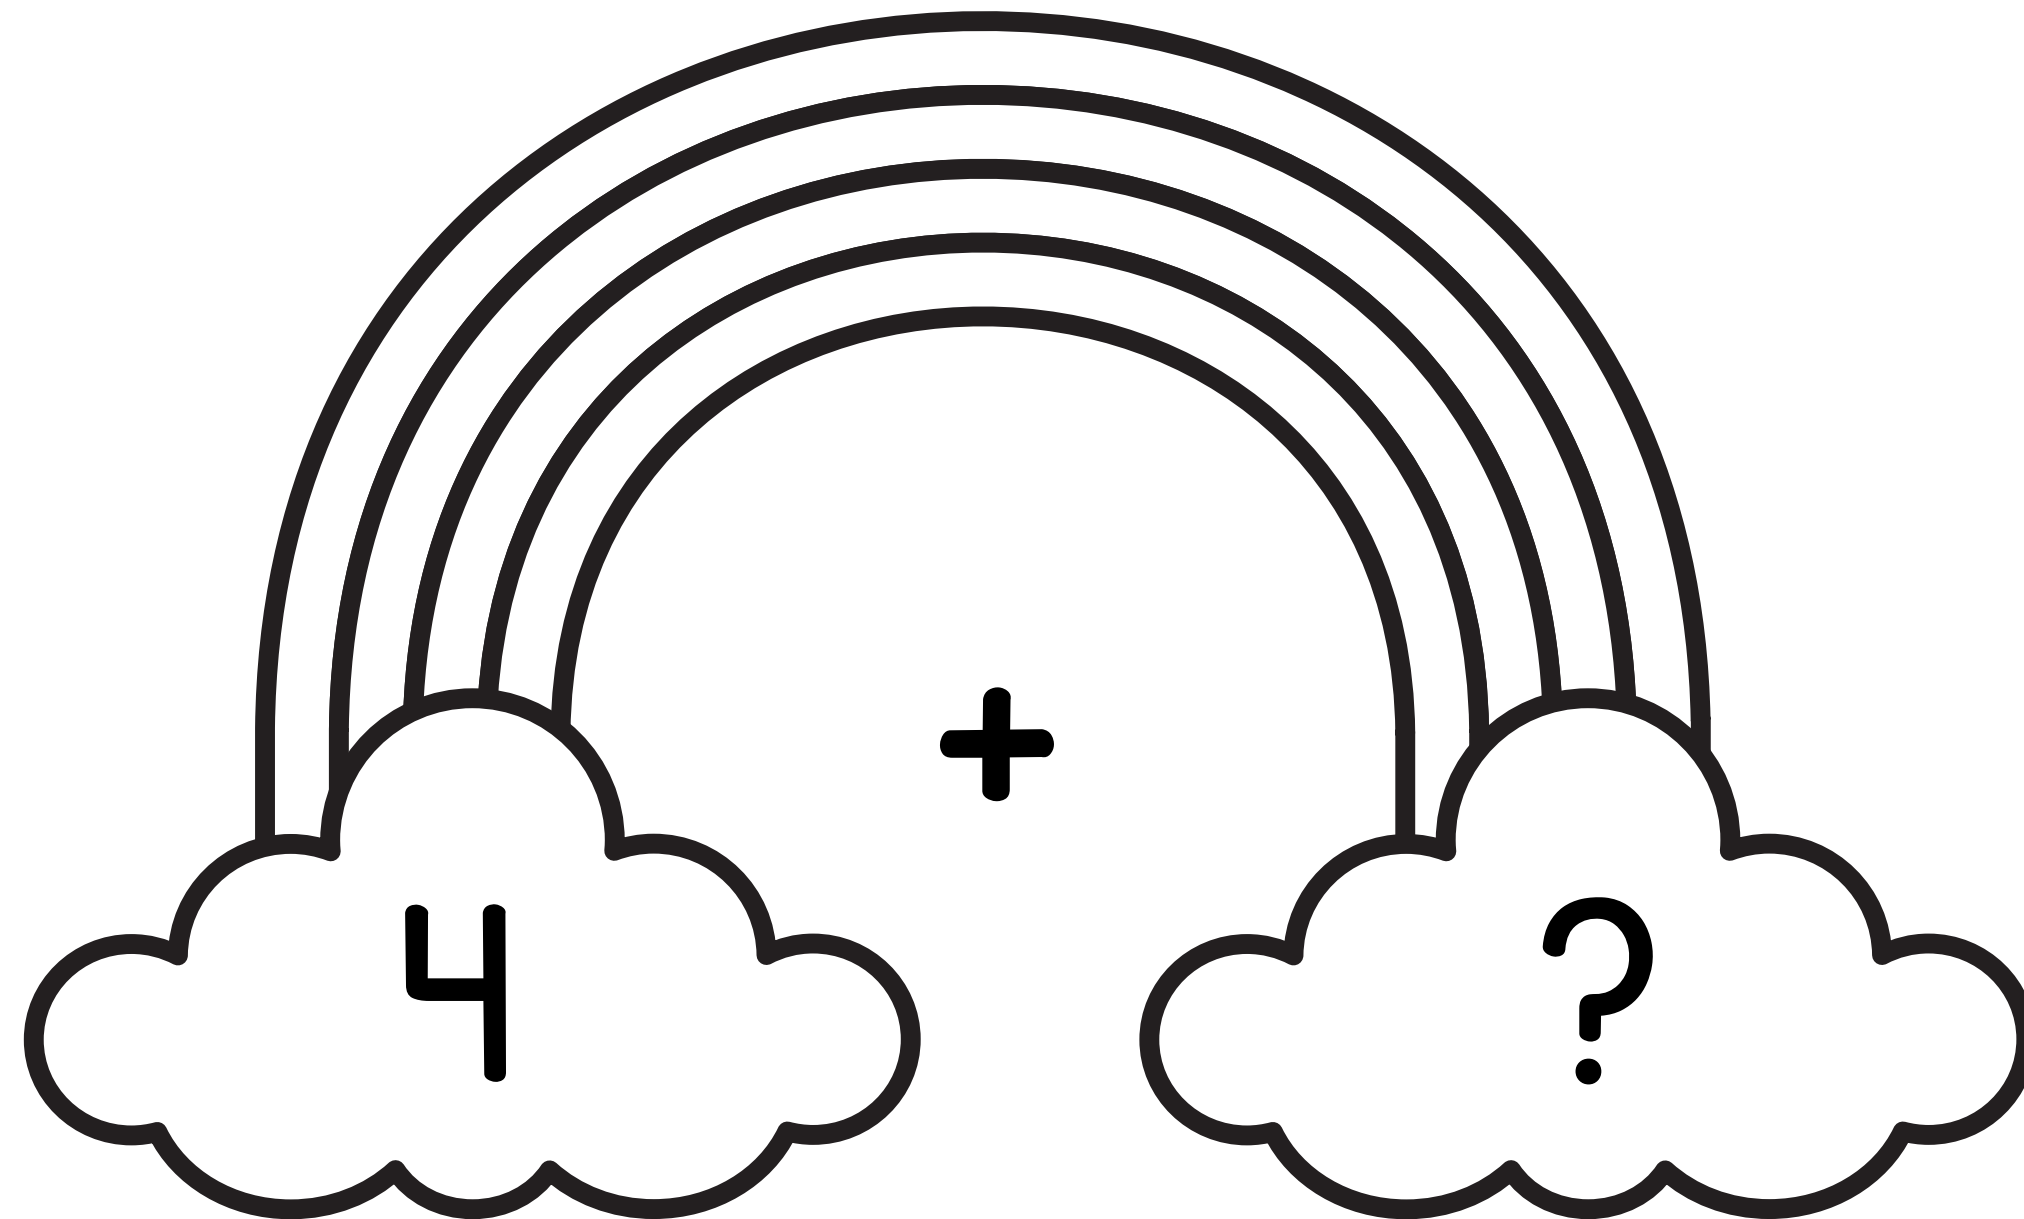

Each number 0-10 has a friend
that helps it add to make the
total of 10:

Find the friend of 10:

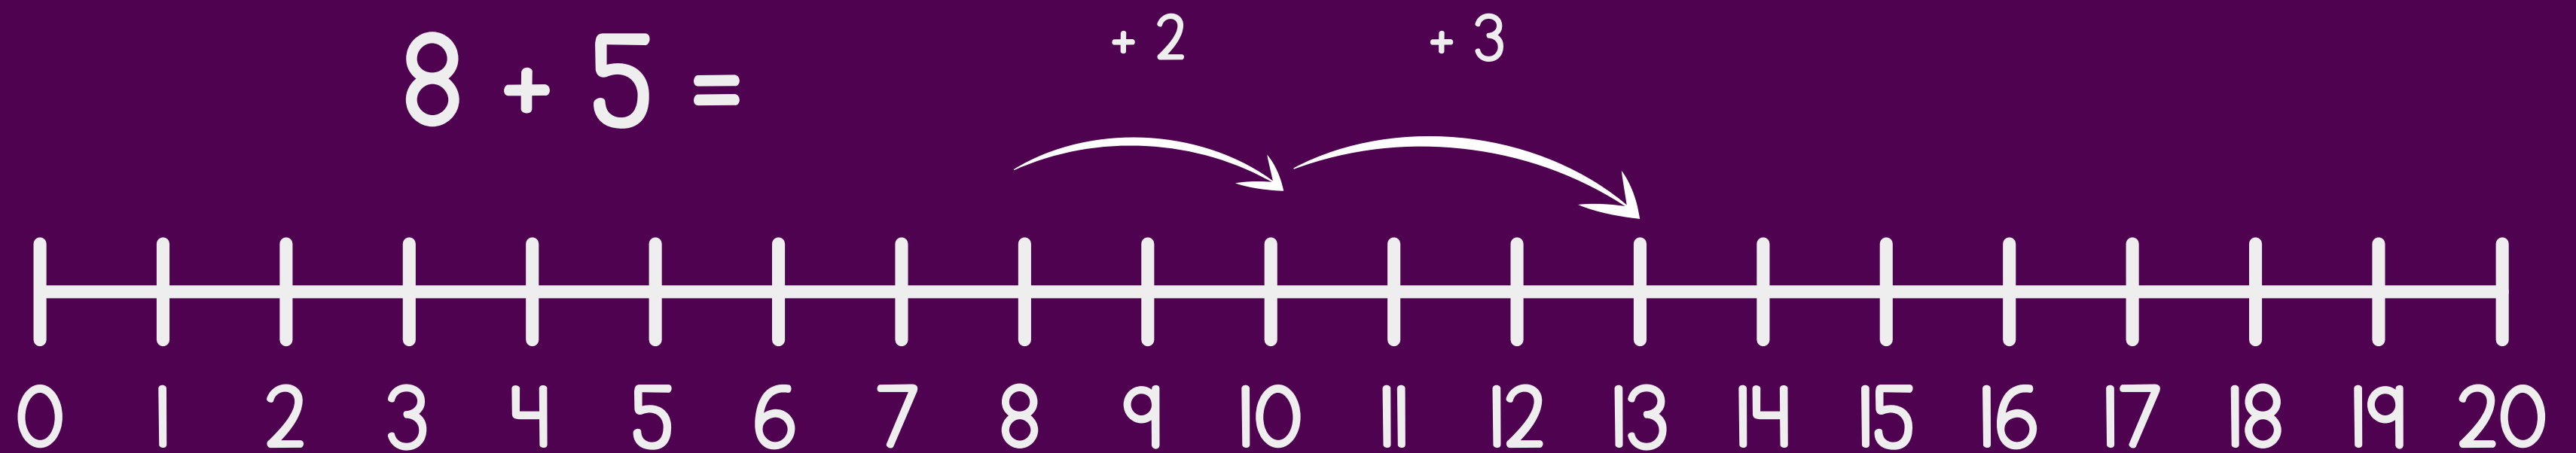

Find the friend of 10:

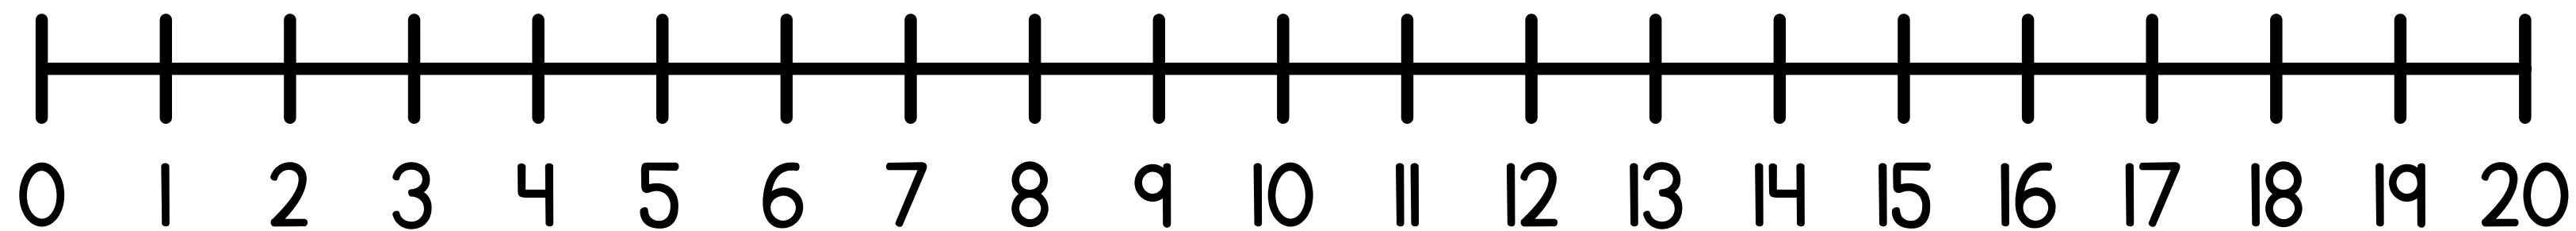

BRIDGE TO 10

Bridging to 10 is a strategy that involves finding the numbers to add to 10, then adding the remaining numbers onto 10.

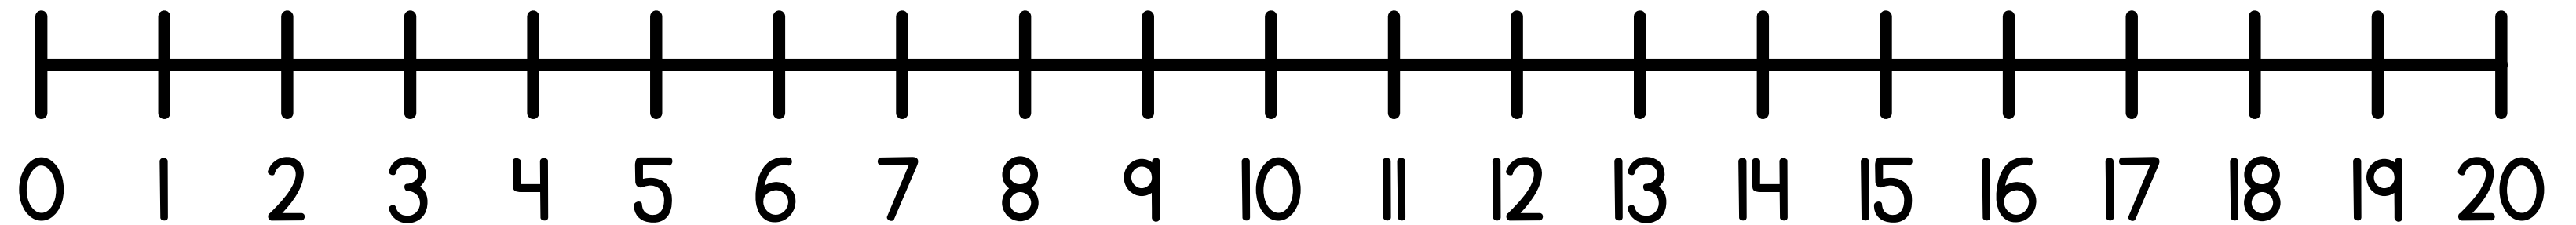

$$8 + 5 =$$

$$9 + 6 =$$

$$7 + 5 =$$

JUMP STRATEGY

The Jump Strategy is used with larger numbers to jump along a number line:

$$15 + 13 =$$
