

3D Shapes

What are 3D shapes?

3D shapes, or three-dimensional shapes, are objects that have length, width, and height.

We will explore the mathematical names of 3D shapes and their properties.

Real life objects:

Common 3D shapes

Cube

Cuboid

Sphere

Cone

Triangular
Prism

Cylinder

Square based
pyramid

Tetrahedron

Properties of 3D shape

Faces

Faces are flat or curved surfaces on a 3D shape

Edges

An edge is where two faces meet

Vertices

Vertices/corners are where two or more edges meet

Cube

Locate a rectangular prism
object in your environment.

**Locate a cube object in
your environment.**

Locate a cylinder object in
your environment.

Locate a cone object in
your environment.

find the 3D shapes

.....

Q

A

Directions

.....

On the next slide, you will see two different shapes with a hand signal above each shape. Make the hand signal for the shape that matches the word at the top!

Q

A

cone

cylinder

triangular Prism

rectangular Prism

cube

cylinder

rectangular Prism

Thank You!

See you next time!
